OBJECTIVE

Results-driven Software Engineer with strong expertise in backend systems, scalable architectures, and cloud-native applications. Experienced in building high-performance APIs, ETL pipelines, and AI-driven products. Proven ability to deliver production-grade solutions in fast-paced environments, optimize system performance, and drive measurable business impact.

SKILLS

Languages & Frameworks: Java, JavaScript, Python, Django, FastAPI, React, Next.js

Databases: MySQL, PostgreSQL, MongoDB, Snowflake

Messaging & Async Processing: Celery, RabbitMQ, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, CI/CD

EDUCATION

B.E. Computer Science & Engineering (CGPA : 8.43) May 2021- May 2025
Government Engineering College Patan

EXPERIENCE

Software Development Engineer

La Net Team Software Solutions (fulltime) *Surat,India*

1. **Python Backend Developer — TOCA Football** Nov 2025 - Present
   - Building scalable backend systems using Django, Celery, and RabbitMQ for handling asynchronous tasks, webhooks, and scheduled jobs
   - Integrating and managing data pipelines between multiple POS systems (MBO, DSR, SevenRooms, BondSports) and HubSpot CRM
   - Fetching and transforming large-scale data from Snowflake for seamless data flow and consistency
   - Optimizing system performance and ensuring smooth automation across services
   - Deploying and managing applications on AWS EC2 for reliable, cloud-based operations

2. **Full Stack AI Developer — CRMOne (AI Social Media Planner)** Jul 2025 - Oct 2025
   - Building scalable backend systems using Django, Celery, and RabbitMQ for handling asynchronous tasks, webhooks, and scheduled jobs
   - Built an AI chatbot to collect brand information through dynamic conversations
   - Generated customized social media posts with captions and visuals for platforms like Instagram, Facebook, LinkedIn, and Twitter
   - Implemented user-configurable settings for topic preferences, date filters, and scheduling
   - Delivered an intelligent and user-friendly automation platform for content planning

Software Development Trainee Jan 2025 - Jun 2025
La Net Team Software Solutions (fulltime) *Surat,India*

- Gained hands-on experience in backend and frontend development using Python, Django, Flask, and FastAPI to build scalable RESTful APIs
- Explored frontend development using React and Next.js for building responsive user interfaces and learned API design, integration, and real-world applications
- Built AI agents using LangChain and LangGraph and understood their practical applications
- Strengthened full-stack development skills and gained exposure to modern development practices.
